Dear Clerk Rockey,

Thank you for your November 4, 2026 written explanation concerning the election-night tabulation equipment malfunction and the subsequent transportation of Washington County V-drives to Harrison County.

As a candidate for Washington County Auditor in the November 3, 2026 general election, I am requesting copies of records relating to the equipment malfunction, transportation of election media, and tabulation of election results.

Specifically, I request:

1. All incident reports, error logs, diagnostic records, and vendor service reports concerning the Washington County tabulator malfunction.
2. The zero report and final tabulation reports generated using the Harrison County tabulator.
3. Records identifying the make, model, serial number, software version, certification, and configuration of the substitute tabulator.
4. Chain-of-custody documentation for all Washington County V-drives transported to and from Harrison County.
5. Washington County and Harrison County election board minutes, written approvals, and communications concerning use of the substitute tabulator.
6. Precinct-level candidate vote totals, tally tapes, reconciliation reports, and the final canvass for the Washington County Auditor election.
7. Available records of communications with Harp Enterprises and Hart InterCivic regarding the malfunction and substitute tabulation procedure.

Please preserve all related election materials, including electronic logs, V-drive data, ballots, audit records, and communications, in accordance with applicable law.

Given the November 17, 2026 deadline for candidate recount and election-contest petitions, I request expedited production of records that can lawfully be disclosed. If any records cannot be released, please identify the applicable legal basis and whether other responsive records can be provided promptly.

Thank you for your assistance.

Rhonda Greene
Candidate for Washington County Auditor
November 3, 2026 General Election
